THE BUILDING

View from the South

WELCOME

Occupying a prime location on the elbow of the River Thames, Brettenham House is a beautiful example of Art Deco architecture, built in the early 1930s.

Respecting and referencing its history and heritage, the new Brettenham House will be a beautiful, sustainable, landmark office building, ready to welcome new occupiers and continue its story into the future.

LANCASTER PLACE

The main entrance of the building is located on Lancaster Place, a busy and thriving route from The Strand to Waterloo Bridge.

Facing the majestic western elevation of Somerset House, the Lancaster Place reception is a welcoming and expansive space with multiple zones for collaboration and casual working. The retained, marble art deco staircases offer a visually stunning connection to the upper floors of the building.

ENTRANCE

SAVOY STREET

A second entrance is situated on the opposite side of the building, on the quiet and charming Savoy Street. Overlooking the tranquil Savoy Chapel gardens, this entrance is intended exclusively for building occupiers.

Acting as a gateway to the amenity areas, it provides an opportunity to touch down and gather thoughts before embarking on a busy day ahead. A triple height void connects this space both visually and physically to the Lancaster Place reception via a beautifully designed bespoke staircase.

FEATURES

SUSTAINABILITY

CARBON

All efforts will be made to minimise carbon throughout the life cycle of the building with Brettenham House being developed as a net zero carbon building. Throughout design, construction and operation we constantly challenge ourselves to dramatically improve upon established targets.

The development therefore has an upfront embodied carbon of 250kgCO₂e/m² which is 74% lower than the GLA target. Over the life cycle of the development, emissions have been calculated as 243 kgCO₂e/m², 46% lower than the current benchmark.

WASTE

The design process will treat waste as a resource and consider opportunities for material optimisation, reclamation and reuse to design out waste from an early stage with the target of diverting 95% of construction waste from landfill.

URBAN GREENING

The current building has little ecological value with no planting present. This will be significantly improved with the sensitive planting not only of the building's extensive usable terraces, but areas across the building that are not accessible but can house planting both to increase the biodiversity net gain and to provide visual amenity to occupiers.

While steeped in history, the workspace at Brettenham House is designed for the most modern and future focussed occupiers with cutting edge smart building technology installed, including:

- Bespoke building app for system control, access and connectivity at your fingertips
- Whole building digital twin enabling granular control, maintenance and customisation options
- Extensive sensor network monitoring real time building conditions and usage and enabling smart and sustainable occupation
- Potential to utilise digital twin as part of tenant fit out to enable meeting room/desk booking and other customisation options
- WiredScore Platinum

AMENITIES

TERRACES

9th floor terrace

The 9th floor houses two impressive terraces with some of London’s best views, thanks to the building’s prime position on the elbow of the River Thames. The north terrace is intended for communal use, accessible to all occupiers in the building. Sensitively landscaped by Townshend, this space offers a stunning amenity for occupiers on a day to day basis or a wonderful location for a one off party or event.

The southern terrace benefits the 9th floor demise exclusively, making this a truly special space within the building. River facing terraces are also provided to the 4th and 5th floors, as well as private outdoor space for the occupier of the 9 Savoy Street southern element of the building.

PANORAMIC

From the City cluster in the east to Big Ben in the west, all of London's major landmarks can be seen not only from the terraces at Brettenham House but, thanks to the building's dual aspect, from the office floors below, with each floor having its own unique viewpoint from this special part of the capital.

VIEWS

ACTIVE TRAVEL

Accessed directly from Savoy Street, the characterful basement vaults of the building house 310 bike storage spaces, including spaces for a variety of cycle types, a wash down facility, a bike repair area and automatic water fountains.

High quality showers and changing rooms are located at Lower Ground level, providing 24 showers, evenly split across two changing rooms, ample lockers, drying rooms, shoe cleaning stations, hairdryers, straighteners, irons and complementary towels and toiletries.

COLLABORATION

The building's dual aspect and approach creates generous communal spaces adjacent to each entrance. These will be beautifully furnished and zoned to provide a variety of different collaboration, work and social spaces for the use of all occupiers.

LOCATION

A COLOURFUL

Brettenham House's location embodies the spirit of the building, a seamless blend of fascinating heritage with the very best in modern culture and offering a space where great things can be achieved. With illustrious neighbours Somerset House and the world famous Savoy Hotel to either side of the building, the vibrant Covent Garden to the north and the South Bank immediately opposite to the south, there really is everything that you could want on your doorstep, and plenty of hidden gems to uncover.

CONTACT

HELICAL

Helical plc are a leading London-focussed property investment and development company who create sustainable and inspiring workplaces which are technologically smart, rich in amenities and promote employee wellbeing.

Market leaders in their approach to both sustainability and smart building technology, Helical strive to minimise carbon during both the construction of buildings and crucially, throughout the building’s ongoing operation. Smart technology is seamlessly integrated into the building fabric to allow truly sustainable and informed occupation.

Most importantly, occupier wellbeing and enjoyment is at the heart of all Helical buildings with amenity provision, access to outside space and beautiful design at the forefront of their activities.

BGY

Buckley Gray Yeoman are Shoreditch originals. Based in east London since the practice was established in 1997, they create architecture that balances depth and delight. They describe themselves as agents of opportunity.

They take what they find – on the ground and in the brief – and uncover unanticipated possibilities. Their work is sensitive, thorough and authentic, but it is also unapologetically joyful and surprising. The practice has grown from a group of three friends to a team of over one hundred, which now has collective ownership of the practice.

They have also spread their geographical wings, delivering projects across the UK and Europe, each carefully tuned to its own specific place and time.
